Lista publicațiilor – Lucian Beznea

Monografii publicate: L. Beznea and N. Boboc: *Potential Theory and Right Processes*. (Mathematics and Its Applications, vol. **572**), Kluwer Academic Publishers/Springer 2004, 376 pagini.

Publicații științifice:

• L. Beznea and C.I. Vrabie: Continuous flows driving branching processes and their nonlinear evolution equations. *Adv. Nonlinear Anal.* **11** (2022), 921-936. https://doi.org/10.1515/anona-2021-0228

• L. Beznea, I.R. Ionescu, and O. Lupaşcu-Stamate: Random multiple-fragmentation and flow of particles on a surface. *J. of Evolution Equations* **21** (2021), 4773-4797, https://doi.org/10.1007/s00028-021-00732-z

• L. Beznea, M. Deaconu, and O. Lupaşcu-Stamate: Scaling property for fragmentation processes related to avalanches. In: *Applications of Mathematics and Informatics in Natural Sciences and Engineering* (Springer Proceedings in Mathematics & Statistics **334**), Springer 2020, pp. 37–45. https://doi.org/10.1007/978-3-030-56356-1_3

• L. Beznea, A.-M. Boeangiu, O. Lupaşcu-Stamate: h-transform of Doob and nonlocal branching processes. *Analysis and Mathematical Physics* **10** (2020), 47. https://doi.org/10.1007/s13324-020-00390-3

• L. Beznea, O. Lupaşcu-Stamate, and C.I. Vrabie: Stochastic solutions to evolution equations of non-local branching processes. *Nonlinear Analysis* **200** (2020), 112021. https://doi.org/10.1016/j.na.2020.112021

• L. Beznea, I. Cîmpean, and M. Röckner: A natural extension of Markov processes and applications to singular SDEs. *Annales de l'Institut Henri Poincaré, Probabilités et Statistiques* **56** (2020), 2480–2506.

• L. Beznea, M.N. Pascu, and N.R. Pascu: Brosamler's formula revisited and extensions. *Analysis and Mathematical Physics* **9** (2019), 747–760.

• L. Beznea, L. I. Ignat, and J. D. Rossi: From Gaussian estimates for nonlinear evo- lution equations to the long time behavior of branching processes. *Revista Matemática Iberoamericana* **35** (2019), 823–846.

• L. Beznea, I. Cîmpean, and M. Röckner: A new approach to the existence of invariant measures for Markovian semigroups. *Ann. de l'Institut Henri Poincaré, Probabilités et Statistiques* **55**(2019), 977–1000.

• L. Beznea, M. Deaconu, and O. Lupaşcu-Stamate: Numerical approach for stochastic differential equations of fragmentation; application to avalanches. *Mathematics and Computers in Simulation* **160** (2019), 111–125.

• L. Beznea and I. Cîmpean: Quasimartingales associated to Markov processes. *Trans. Amer. Math. Soc.* **370** (2018), 7761-7787

• L. Beznea, I. Cîmpean, and M. Röckner: Irreducible recurrence, ergodicity, and extremality of invariant measures for resolvents. *Stochastic Processes and their Applications* **128** (2018), 1405-1437.

• L. Beznea and I. Cîmpean: Invariant, super and quasi-martingale functions of a Markov process. In: *Stochastic Partial Differential Equations and Related Fields* (Springer Proceedings in Mathematics & Statistics **229**), Springer 2018, pp. 421-434.

• L. Beznea and S. Vlădoiu: Markov processes on the Lipschitz boundary for the Neumann and Robin problems. *J. Math. Anal. Appl.* **455** (2017), 292-311

• L. Beznea, M.N. Pascu, and N.R. Pascu: Connections between the Dirichlet and the Neumann problem for continuous and integrable boundary data. In: *Stochastic Analysis and Related Topics* (Progress in Probability **72**, Birkhäuser), Springer 2017, pp. 85-97.

• L. Beznea, M. Deaconu, and O. Lupaşcu: Stochastic equation of fragmentation and branching processes related to avalanches. *J. of Statistical Physics* **162** (2016), 824-841.
