

Call for lecture courses

Școala Normală Superioară București (SNSB) – Department of Mathematics – has opened the call for lecture courses for the academic year 2010-2011.

Conditions

- Each lecture course will consist of 24h lecture + 24h problem-solving sessions, in 12 weeks. The Master courses may be concentrated in 24h over at least 3-4 weeks.

The courses needed are

- 4 courses accessible to students from the 3rd year (preliminary cycle) in algebra-geometry-topology-analysis.
- 10 Master courses, preferably in one of the fields: Algebra, Algebraic topology, Geometry (algebraic, differential, arithmetic), Number theory, Functional analysis, PDE, Mathematical Physics, Probability theory, Stochastic Analysis.
- To eliminate redundancy, courses offered in 2010-2011 at the University of Bucharest will not be accepted.
- The purpose of the courses for the preliminary cycle is to consolidate basic mathematical notions and to present classical theorems. They should not aim to present recent research results. The Master Courses will have a slight opening towards research. The level of the courses must be adapted in real time to the actual understanding level of the SNSB students (not that of senior audience members).
- The problem solving sessions may not be substituted by lectures. The lecturer may nominate an assistant for these sessions.

Financial conditions

- SNSB will provide room and board in Bucharest and a complementary allowance.
- For lecturers from abroad we will cover international travel costs.

How to propose a course

- By e-mail to the address snsb@imar.ro until **April 30, 2010**.

The proposal will contain

- The title of the course (in English).
- The abstract and the course outline (5-30 lines, in English).
- The list of the best 5 publications of the proposer (not necessarily connected to the proposed course).

Selection of the courses

- The courses will be selected by the SNSB Scientific Committee.
- The selected courses will be communicated before May 30, 2010.

For questions please write to snsb@imar.ro
