

Call for Courses in Informatics

Școala Normală Superioară București (SNSB) has opened the call for courses in Informatics for the academic year 2009–2010.

Teaching conditions

- Each course consists of 48 hours including both lecture and exercise classes, with a maximum of 4 hours a day.
- To eliminate redundancy, courses offered in 2009–2010 at universities in Bucharest will not be accepted.
- The proposed courses should respect the character of the Informatics teaching at SNSB, in that they must be clearly based upon solid mathematical and logical foundations and have an orientation towards research. The level of the teaching must be adapted in real time to the actual understanding of the SNSB students.
- Courses that are coherent to the rest of the Informatics curriculum, especially those having a substantial relation to formal methods, are preferred.
- The lecturer may appoint an assistant for the exercise classes.

Financial conditions

- SNSB provides a financial allowance for each course.
- In addition, if needed, SNSB provides room and board in Bucharest and covers the travel costs (including international travel when applicable).

How to propose a course

- By e-mail at snsb@imar.ro until September 1st, 2009.
- The proposal should be written in English and should contain:
 1. The title of the proposed course.
 2. The abstract and the course outline (max. 1 page)
 3. The list of the best 5 publications of the proposer (not necessarily related to the proposed course).

Selection of courses

- The result of the proposals will be communicated before September 15th, 2009.

Further enquiries may be sent to snsb@imar.ro
