*Point processes: definition,  
characterisation and applications*

**Radu Stoica**

**Joi 27 aprilie 2017, ora 11:00, sala 306 -307 "C. Bănică"**

**Abstract:** This talk introduces point processes and presents their characterisation using void events. The Campbell-Mecke theorem is also presented. The importance of these results is outlined by the construction of appropriate summary statistics for point processes. Finally, conclusions and perspectives are depicted.
