Errata to "A Cohomology (p+1) Form Canonically Associated with Certain Codimension-q Foliations on a Riemannian Manifold" (Tokyo Journal of Mathematics, Vol. 29, No. 1, pp. 247–270, June 2006)

Gabriel BADITOIU, Richard H. ESCOBALES, Jr. and Stere IANUS

Boston University, Canisius College and University of Bucharest

The last sentence of Theorem 1.2 on page 250, "Finally, if **H** is also integrable, then $\kappa \wedge \chi_{\mathbf{F}}$ is always closed." should read: "If $q \geq 3$, and if κ is horizontally closed, and if **H** is integrable, then $\kappa \wedge \chi_{\mathbf{F}}$ is closed."
