Dr. Adrian Curaj, Director of UEFISCDI  
Dr. Alexandru Babes, President of CNCS

RE: Eligibility information in support of Marius Leordeanu's participation in a research project.

Dear Dr. Curaj and Dr. Babes,

I am a co-author of the IEEE Computer Graphics & Applications article: "New Methods for Digital Modeling of Historic Sites", November/December 2003 (vol. 23 no. 6). The full list of authors with their affiliation is shown below (the paper was a collaboration of two groups):

From Columbia University authors  
Peter K. Allen, Alejandro Troccoli, Benjamin Smith and Stephen Murray

From The City University of New York authors  
Ioannis Stamos and Marius Leordeanu,

(please note that the author ordering and grouping is presented as it appears on the journal article).

This journal paper was the result of a joint collaboration between two teams, one from Columbia University and the other from The City University of New York. Dr. Marius Leordeanu was a principal author of the City University of New York university team. His contribution in that paper was essential. I would like to state that Marius Leordeanu was a key co-author with a significant contribution, and should have the same rights as any other author of the above mentioned article. The first author, Professor Peter K. Allen of Columbia University, will also confirm this fact.

Please do not hesitate to contact me if you have additional questions.

Sincerely,

Ioannis Stamos  
Professor of Computer Science  
Hunter College and The Graduate Center  
The City University of New York  
695 Park Avenue, New York, NY 10065
